### WORK HISTORY

---

**Some Company, NY**

2017-Present

#### *STAFF NURSE*

- Provide highly skilled care to the critically ill child by monitoring and assessing physiologic variables and administer appropriate interventions for positive outcomes.
- Initiate and complete patient admission history and assessment according to established guidelines.
- Assess patient's psychosocial needs and behaviors relating to the current situation and develop an individualized plan of care for each patient. Revise plans as needed.
- Observe symptoms or changes in patient status and respond promptly, exercising reasonable judgment.
- Explain the rationale for selected therapies based on observation and findings, and evaluate the patient's response to the therapeutic regimen.
- Administer blood and blood product according to hospital standards, and correctly obtain and interpret blood gas values.

**Some Company, NY**

2011-2017

#### *REGISTERED NURSE*

- Created a written, individualized plan of care based on the priority of patient problems, anticipated length of stay, input from patient and family and other members of the health care team.
  - Collaborated with team members to make changes in the plan of care, as deemed necessary.
  - Utilized clinical resources in implementing patient care and provided a rationale for patient care decisions.
  - Conducted clinical rounds, provided emergency care and administered medications to a patient.
  - Operated equipment required for patient care according to manufacturer's recommendations.
  - Performed and assisted with procedures and treatments on the unit including but not limited to changing dressings, feeding patients and providing operative care.
-
